

PRODUCT CONTENT LABEL

**The product is sold in blocks of 100 kilowatt hours (kWh).
The product will be made up of the following renewable resources.**

Energy Resources	Green Power [projected power mix] ¹	Generation Location
Eligible New Renewables²		
Landfill Methane Gas	> 99%	South Carolina
Solar	< 1%	South Carolina
Wind	< 1%	South Carolina
TOTAL	100%	

The kWhs above represent the resource makeup of each block of renewable electricity you have purchased from Santee Cooper. The remainder of your electricity contains the following mix of electricity resources: Coal 70.98%, Nuclear 8.74%, Oil -.01%, Natural Gas 13.52%, Hydro .97%, Methane Gas .32%, Purchases or Other 5.47%.

The average electric usage for a Santee Cooper residential customer is 1,100 kWh.

¹ These figures reflect the power that we expect to generate and provide. Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the electricity you purchased during the preceding year. These percentages also reflect the prior year's historical generation.

² New Renewables are eligible generation facilities beginning operation on or after January 1, 1997.

For specific information about this electricity product, contact Santee Cooper at (843) 761-8000, extension 3205, or visit www.santeecooper.com/greenpower

The Green-e Energy Program certifies that Green Power meets the minimum environmental and consumer protection standards established by the non-profit Center for Resource Solutions. For more information on Green-e Energy certification requirements call 1-888-63-GREEN or visit www.green-e.org.
