Who We Are

Santee Cooper, South Carolina's state-owned electric and water utility, is the state's largest power producer.

Based on generation, Santee Cooper is the nation's largest publicly owned electric utility among state, municipal and district systems, and the third largest based on megawatt-hour sales to ultimate customers.

The source of power for more than 2 million South Carolinians, Santee Cooper provides direct service to more than 163,000 retail customers in Berkeley, Georgetown and Horry counties. Santee Cooper is the primary source of power distributed by the state's 20 electric cooperatives to more than 685,000 customers located in the state's 46 counties.

Santee Cooper also supplies power directly to 31 large industrial facilities in 10 counties, the cities of Bamberg and Georgetown, and the Charleston Air Force Base.

Through the Santee Cooper Regional Water System, water is sold wholesale to the Lake Moultrie Water Agency. The agency then sells the water to its four members: the Summerville Commissioners of Public Works, the city of Goose Creek, the Berkeley County Water and Sanitation Authority, and the Moncks Corner Public Works Commission. Santee Cooper's Lake Marion Regional Water System serves 1,000 customers in the town of Santee.

Santee Cooper was the first utility in the state to offer Green Power, electricity generated by renewable resources such as solar and decomposing garbage in selected landfills.

The utility is governed by an 11-member board of directors that is appointed by the governor, deemed fully qualified by the Senate Public Utilities Review Committee and confirmed by the state Senate. The board is comprised of directors representing each of the six congressional districts; one from each of the three counties (Berkeley, Georgetown, Horry) where Santee Cooper serves retail customers directly; two directors with previous electric cooperative experience, and a chairman appointed at large.

The mission
of Santee Cooper
is to be the state's
leading resource
for improving
the quality of life
for the people
of South Carolina.

To fulfill this mission,
Santee Cooper is committed to:

- being the lowest cost producer and distributor of reliable energy, water, and other essential services
- providing excellent customer service
- maintaining a quality work force through effective employee involvement and training
- operating according to the highest ethical standards
- protecting our environment
- being a leader in economic development

Advisory Board

Mark Sanford
Governor

Mark Hammond
Secretary of State

Henry D. McMaster
Attorney General

Richard A. Eckstrom
Comptroller General

Converse A. Chellis III
State Treasurer

Board of Directors

O.L. Thompson III
Chairman
At-large
Mt. Pleasant, S.C.

President and chief executive officer of O.L. Thompson Construction Co. Inc. that includes Thompson Trucking Co. and Wando Concrete

G. Dial DuBose
First Vice Chairman
3rd Congressional District
Easley, S.C.

Real estate consultant at Nalley Commercial Properties in Easley, S.C.

Clarence Davis
Second Vice Chairman
2nd Congressional District
Columbia, S.C.

Partner in Nelson Mullins Riley & Scarborough LLP, a Columbia-based law firm

Continued on page 6

Board of Directors (continued)

William A. Finn
1st Congressional District
Charleston, S.C.

Chairman of AstenJohnson, a specialty textile company for the printing and papermaking industries based in Charleston, S.C.

J. Calhoun Land IV
6th Congressional District
Manning, S.C.

Partner in Land, Parker and Welch, a general practice Manning law firm

Dr. John Molnar
Horry County
Myrtle Beach, S.C.

Medical Director for Grand Strand Regional Medical Center, Emergency Department

Peggy Pinnell¹
Berkeley County
Moncks Corner, S.C.

Owner of State Farm Insurance in Moncks Corner

James W. Sanders Sr.
5th Congressional District
Gaffney, S.C.

Pastor of Bethel Baptist Church in Gaffney for 60 years and active in numerous civic and business organizations

David A. Springs
Georgetown County
Murrells Inlet, S.C.

Retired consulting engineer for electric cooperatives and municipal utilities with Southern Engineering Co. of Georgia

Cecil Viverette
At-Large
Hilton Head Island, S.C.

Retired president and CEO of Rappahannock Electric Cooperative in Virginia

Barry Wynn
4th Congressional District
Spartanburg, S.C.

President of Colonial Trust Co., a private trust company specializing in investment management and estate services

¹ Confirmed by S.C. Senate May 2009

Executive Management

Lonnie N. Carter	President and Chief Executive Officer
Bill McCall	Executive Vice President and Chief Operating Officer
Elaine G. Peterson	Executive Vice President and Chief Financial Officer
James E. Brogdon Jr.	Senior Vice President and General Counsel
R.M. Singletary	Senior Vice President of Corporate Services

Management

Senior Vice Presidents:

Terry L. Blackwell	Power Delivery
Maxie C. Chaplin ¹	Generation

Vice Presidents:

S. Thomas Abrams	Planning & Power Supply
Jeffrey D. Armfield	Business Services and Treasurer
Wm. Glen Brown	Human Resource Management
Zack W. Dusenbury	Retail Operations
Glenda W. Gillette	Administration
Thomas L. Kierspe.....	Engineering and Construction Services
L. Phil Pierce	Fossil and Hydro Generation
Suzanne H. Ritter	Corporate Planning and Bulk Power
Marc Tye	Conservation and Renewable Energy
Laura G. Varn	Corporate Communications and Media Relations

Stephon Terrell Thompson.....	Auditor
Pamela J. Williams.....	Corporate Secretary and Associate General Counsel

¹Retired December 2008

Employees

Number of regular employees..... 1,840²

²As of December 31, 2008

In its 2008 annual report, the South Carolina Human Affairs Commission ranked Santee Cooper first among state agencies that employ more than 1,000 employees and third among all state agencies reporting for consistent recruitment and retention of a diverse work force.

Santee Cooper Regional Water System

Location	Moncks Corner, S.C.
Construction cost	\$34.7 million
Commercial operation	Oct. 1, 1994
Capacity of treatment plant	36 million gallons per day (mgd)
Miles of pipeline	26
Size of elevated storage tank	1 million gallons
Size of ground storage	10 million gallons
Water supply	Lake Moultrie
Wholesale water sold to.....	Lake Moultrie Water Agency ¹
Water users:	136,000

¹The Lake Moultrie Water Agency sells the water to the City of Goose Creek, the Berkeley County Water & Sanitation Authority, the Moncks Corner Public Works Commission and the Summerville Commissioners of Public Works.

Lake Marion Regional Water System

Location	Santee, S.C.
Construction cost	\$36 million
Commercial operation	May 1, 2008
Capacity of treatment plant	8 (mgd)
Miles of pipeline	1 ²
Size of elevated storage tank	1 million gallons
Size of ground storage	2 million gallons
Water supply	Lake Moultrie
Wholesale water sold to.....	Lake Moultrie Water Agency ³
Water users:	1,030

²The first phase of the project provided initial service to Santee. Construction is underway for a five-mile pipeline to the elevated storage tank in Orangeburg County. Service will eventually expand to the remaining members of the Lake Marion Regional Water Agency.

³The Lake Marion Regional Water Agency is comprised of Berkeley, Calhoun, Clarendon, Dorchester, Orangeburg and Sumter counties, the town of Santee and the city of Sumter.

Lake Information

	Lake Marion	Lake Moultrie
Acres	100,607	59,874
Maximum elevation	76.8 feet	75.5 feet
Gallons of water in Lakes Marion and Moultrie:	756 billion	
Length of dams and dikes:	40 miles	
Length of Tailrace Canal:	4 miles	
Length of Diversion Canal:	5 miles	
Pinopolis Lock:	75 feet deep, 180 feet long, 60 feet wide

Santee Cooper Green

Santee Cooper has two dozen programs under its Santee Cooper Green umbrella, programs that fall into one of two camps: How Santee Cooper lives green, and How Santee Cooper helps others go green.

One way Santee Cooper lives green is by generating renewable Green Power.

2008 Green Power sales:24,272 MWh

Green Power customers support the development of renewable Green Power by purchasing blocks each month through their bill. Renewable Green Power costs more to generate than Santee Cooper's traditional generation, and the money raised through Green Power sales is put entirely into the development of new renewable energy. Santee Cooper currently generates Green Power through landfill gas facilities and solar panels, and the utility is exploring the feasibility of wind generation and biomass.

Coastal Carolina University Green Power Solar Pavilions	16 KWs	July 2006

¹ Data as of Dec. 31, 2008.

² Green Power Partners are committed environmental stewards who have partnered with Santee Cooper in an effort to promote Green Power. To become a partner, these businesses agree to purchase a percentage of their electricity as Green Power.

How Santee Cooper Lives Green

Santee Cooper in 2008 made significant advancements in its commitment to renewable energy with the opening of a new landfill biogas Green Power generating station, the dedication of several new Green Power Solar Schools, the announcement of plans to purchase power from a biomass generating plant, the launch a new solar research initiative and the installation of new wind energy research towers in Georgetown and Horry counties.

In addition to generating renewable Green Power, Santee Cooper has a corporate recycling program that recycled more than 1 million tons of office waste and combustion byproducts in 2008, including 438,238 tons of fly ash and 536,423 tons of gypsum. The utility teaches green through programs including its annual summer Energy Educators Institute, its curriculum-enhancing environmental education programs at the Old Santee Canal Park and its Green Power Solar Schools program, which includes an extensive sixth grade curriculum for students in the utility's Green Power Solar Schools (a partnership with the state's electric cooperatives) and a summer institute to help teachers plan their Solar Schools lessons.

Santee Cooper is practicing what it preaches on conservation. It completed a corporate-wide energy audit last year and is systematically making efficiency improvements. The state-owned utility is already conserving 550 megawatts, mostly through demand-side management programs with industrial customers. By 2020, Santee Cooper hopes to control 650 megawatts in demand-side programs and to generate another 445 megawatts through new conservation and renewable energy initiatives. All told, this would effectively displace the need for 1,100 megawatts of base load electrical generation, or two large scale units.

On Earth Day, Santee Cooper launched an unprecedented compact fluorescent light (CFL) giveaway, offering customers one dozen of the energy efficient bulbs free of charge. By the end of the year, Santee Cooper had given away approximately 800,000 bulbs. Because 40 percent of Santee Cooper residential customers are absentee — reflecting ownerships of rental and vacation homes throughout the coastal direct-serve communities — the promotion actually reached more than 75 percent of customers living in Santee Cooper's service area.

Go Green with Santee Cooper

Santee Cooper is committed to promoting a partnership of stewardship with its customers, developing and executing programs that help others go green. Santee Cooper Green has several environmentally friendly programs, many of which are customer-focused.

Customers can visit the Web site www.santeecoopergreen.com where they can take a free energy audit, engage in smart energy planning and check out options for increasing their home's energy efficiency with low-interest loan programs. Santee Cooper continues to promote energy efficiency through a series of monthly Green Living tips distributed to newspapers statewide.

Environmental Stewardship

Santee Cooper has pioneered many environmental stewardship programs among utilities in South Carolina, from its decades-old efficient homes programs to 2008's wind-power research initiatives. Here are some of the other ways Santee Cooper fulfills its ongoing commitment to the environment:

Environmental Control Technology

When Cross Unit 4 entered commercial operation in October 2008, one-third of the unit's \$755 million construction costs were spent to make it the cleanest coal-fired unit in South Carolina. The emissions-control systems will result in the removal of 99 percent of particulate matter, 97 percent of sulfur dioxide and 90 percent of nitrogen oxides.

System wide, nitrogen oxide emissions fell 13 percent since 2007, and sulfur dioxide emissions are down 30 percent over the same time period.

Lakes and Vector Management

Protecting lakes Marion and Moultrie, South Carolina's largest freshwater resource, has always been of paramount importance to Santee Cooper since the reservoirs were completed in 1942.

With a combined 160,000 acres in five counties, the lakes host 48 water-quality monitoring stations. Monthly samples are analyzed by Santee Cooper's analytical and biological services department and data is shared with numerous state and federal agencies.

Maintaining water quality is important to preserving the natural habitat of the Santee Cooper lakes but also to ensure a safe water source for the Santee Cooper Regional and Lake Marion Regional water systems.

Santee Cooper's vector management department has been battling mosquitoes throughout the utility's 75-year history, effectively eliminating malaria in the counties surrounding the lakes. The department's employees routinely travel door to door through

Continued on pages 26-27

Environmental Stewardship (continued)

lakefront subdivisions, searching for potential breeding grounds and educating homeowners about techniques that discourage breeding. Vector Management also sets and inspects light traps loaded with carbon dioxide or “dry ice,” which attracts mosquitoes. Technical associates routinely check the traps, and selected specimens end up under a microscope. This helps the department determine when and where to spray, using approved and environmentally friendly methods.

Wildlife Habitat Management

Santee Cooper nurtures wildlife habitats on its transmission line rights of way throughout the state, offering grants to people who lease the land and maintain it according to guidelines of the South Carolina POWER for Wildlife program.

Creating Sanctuaries for Wildlife

Santee Cooper and the S.C. Department of Natural Resources have a long history of working together to manage the lakes and the properties that surround the state’s largest freshwater resource, through fisheries management and state wildlife management areas. Santee Cooper also supports the Santee National Wildlife Refuge in Clarendon County.

Forestry

Santee Cooper manages more than 27,000 acres of forest land around the lakes in Berkeley, Calhoun, Clarendon, Orangeburg and Sumter counties and in nearby Florence and Jasper counties.

Palmetto Trail

Santee Cooper helped blaze South Carolina’s Palmetto Trail, a planned 162-mile long hiking, biking and camping pathway from the mountains to the sea. The trail’s first segment opened in January 1996. The 24-mile long Lake Moultrie Passage created widespread access for hikers and cyclists to some of the most beautiful

Environmental Stewardship (continued)

vistas around the lake it edges. It is one of three sections that Santee Cooper helped build and continues to maintain.

The other sections include the 20-mile long Eutaw Springs Passage and the 33-mile long Lake Marion Passage. Santee Cooper was also involved in the 2008 opening of two outdoor centers, the High Hills Outdoor Center in Wedgefield and the Hell Hole Outdoor Center in St. Stephen.

Old Santee Canal Park

The 195-acre park, whose construction was financed by Santee Cooper, opened in 1989. It features an interpretive center, theater and classroom. Its staff now includes an education coordinator who is focused on environmental programs. School children across the Lowcountry enjoy outings such as “Nature on the Go,” essentially an abbreviated school field trip described as “taking the park to the school.” The park’s environmental programs emphasize the vast diversity of plant and animal life found throughout the park, covering topics such as insects, reptiles, trees and wetlands.

The park features two miles of boardwalk and hiking trails along Biggin Creek that parallel the Tailrace Canal. A large floating dock is inviting to boaters. The Stony Landing House, circa 1843, provides a scenic overlook at the point where the west branch of the Cooper River begins.

GOFER

GOFER, Give Oil for Energy Recovery, is Santee Cooper's used motor oil collection and recovery program. Santee Cooper started the GOFER program in 1990 to give people throughout South Carolina a convenient place to properly dispose of used motor oil.

Santee Cooper collected 1,824,754 gallons of used motor oil in 2008, representing a 9.9 percent increase over 2007 and 18,568,697 kWhs of electricity as well as a savings of \$1,861,619 in fuel costs.

Visit www.scgofer.org for more information.

Economic Development

The Power Team, Santee Cooper's economic development partnership with The Electric Cooperatives of South Carolina, significantly advanced development efforts throughout the state, especially in some of the more rural and economically challenged areas.

Since initiating new incentives in 2006, the Power Team has committed to more than \$1.8 million in grants to local agencies to certify sites, provide professional development and help with strategic planning for economic development agencies.

Horry County State Bank broke ground for a new Operations Center in the Loris Commerce Center. Google held the Grand Opening Celebration at its new facility in the Mt. Holly Commerce Park. American Gypsum began production in its manufacturing plant in Georgetown County, a partnership with Santee Cooper through which it provides wallboard from gypsum produced as a byproduct at Santee Cooper's Winyah Generating Station.

All told in 2008, the efforts of Santee Cooper and its partners resulted in 2,385 new jobs, \$519.3 million in capital investments and more than 35,300 kilowatts of new load.
