Reduce the Use: Business

CUSTOM REBATES
10¢ a kWh Saved

REDUCETHEUSE.com/CB

Look for new ways to save energy.

We understand that one size doesn't fit all. That's why Santee Cooper offers Business Custom Rebates. While our Reduce the Use Business Prescriptive Rebates cover most of the common, big energy users, there are energy saving measures unique to some businesses that are still not addressed.

Our Custom Rebates can be tailored specifically to provide unique, energy saving initiatives on a business-by-business basis.

"We had an idea that installing variable frequency drives on our three Lazy River pumps would qualify for a Custom Rebate. Well, did it ever! The upgrade is saving 64,000 kWh per year and the rebate of \$6,435 covers over a third of the installation."

— David C. Nelson, Executive Vice President, Plantation Resort

What's your energy saving idea?

No one knows your business better than you do, so Santee Cooper wants you to look at the biggest energy users in your business and come up with some smart, new ways to save energy! Maybe it's an upgrade for big energy users, like pumps for irrigation or domestic water use.

Qualify for Custom Rebates at 10¢/ kWh saved.

An Energy Advisor can help you determine if your energy saving idea qualifies for a rebate and lead you through the validation, commissioning and rebate process. Contact an Energy Advisor via email at energy.advisor@santecooper.com or by phone at 843-347-3399 ext. 3910 in Horry/Georgetown counties or 843-761-8000 ext. 3910 in Berkeley County. For information on all of our Business Rebates, visit **REDUCETHEUSE.com/CB**.
