South Carolina

Make your house a Smart Energy Home

There's no better way to make your home more comfortable and energy efficient than replacing window, adding insulation and, especially, installing high-efficiency HVAC units. An HVAC unit typically uses more energy than any other single appliance in your home. Keep your family comfortable, and save energy and money year-round by making energy efficient home improvements — including installing new, high-efficiency 15 SEER heat pumps — with a low-interest Smart Energy Loan from Santee Cooper. For more information: call your Santee Cooper Energy Advisor at (843) 347-3399 or (843) 761-8000, e-mail energy.advisor@santeecooper.com or go to **REDUCETHEUSE.com**.

Available Rebates up to \$700

Includes \$600 Maximum Smart Energy Existing Home Rebate + \$50 per up to two 15 SEER Heat Pumps with Quality Installation. Limit: two heat pump rebates per customer within ten years.

Santee Cooper Smart Energy Existing Homes Program Rebate Limitations: Applications must be approved and eligible equipment verified prior to installation. Multiple rebates for multiple installations of the same type of energy-saving measure are subject to program limitations. The rebate will be paid after confirmation of installation by a Santee Cooper representative. Accepting a rebate for an Individual Equipment Improvement Option makes a home ineligible for Whole Home Improvement Rebate. Homeowners receiving Individual Equipment Improvement Option rebates are not eligible for additional rebates on similar equipment for a period of at least 10 years after payment of the rebate. Complete terms and conditions, including additional limitations, are available upon request or at **REDUCETHEUSE.com**. Offer Good through December 31, 2010.
